WEBSITE ANALYSIS **ACCESSIBILITY** **PERFORMANCE**

Table of Contents

1 Result	3
1.1 Scorecard	3
1.2 Top Issues	3
2 Quick Wins	4

1 Result

The website works in principle — but loses impact in several places (demo text).

1.1 Scorecard

Area	Score	Assessment
Accessibility	58 of 100	Significant action needed
Performance	74 of 100	Solid baseline
SEO	81 of 100	Professional
Security	69 of 100	Gaps in headers
Mobile	77 of 100	Good

1.2 Top Issues

The following points currently have the biggest impact on how the website functions (demo text).

1.2.1 1. Some users can't perceive content

42 affected elements (demo)

The structure isn't parseable for screen readers (demo text).
Tables and lists are styled visually but not marked up as such in the source code (demo text).

1.2.2 2. Text is hard to read under real-world conditions

9 affected elements (demo)

Light text on a light background makes reading in sunlight difficult (demo text).
Contrast ratio as low as 2.1:1 in places — the minimum is 4.5:1 (demo text).

2 Quick Wins

- Raise contrast ratios to 4.5:1 (effort: low, demo)
- Add ARIA labels to interactive elements (effort: medium, demo)
- Place a visible call-to-action on the homepage (effort: low, demo)
